Professional Summary

I am a second-year B.Tech student with a strong interest in software development and problem-solving. I have a solid foundation in Data Structures and Algorithms and am proficient in Python, HTML, CSS, and modern web technologies. I am highly motivated to learn new technologies and collaborate effectively in team-based projects.

Education

Bachelor of Technology in Computer Engineering Rajarambapu Institute of Technology, Rajaramnagar, Sakharale CGPA: 8.5	Ongoing
HSC (12th) Sadaguru Gadage Maharaj College, Karad Percentage: 76.67	2024
SSC (10th) Kanya Vidyalaya, Manrajuri Percentage: 97.40%	2022

Projects

Cow & Buffalo Breed Recognition System

- Technologies Used: Python, TensorFlow, TensorFlow Lite, Transfer Learning Model, Keras, MobileNetV2
- Developed an offline AI based mobile system to identify cow and buffalo breeds using image classification and provided agricultural insights like milk yield range, heat tolerance, basic health appearance to support farmers.

Smart Image Based Wildlife Monitoring System

- Technologies Used: Raspberry Pi, Python, OpenCV, Machine Learning, PIR sensor, GSM module
- Developed a smart system that detects wild animal movement using PIR sensor and USB webcam to capture images. The Raspberry Pi processes the image using machine learning, and when animal detected, the system sends alert messages through a GSM module to help protect villages and reduce human-wildlife conflict.

Anti Suicide Fan

- Technologies Used: Arduino Uno, GSM module (SIM800L), Relay Module, DC Motor, Buzzer, Load cell sensor.
- Built an Arduino-Based anti-suicide fan system that detects unusual load or hanging attempt and send alert message through a GSM module.

Skills

Frontend: HTML, CSS, Javascript(ongoing)

Programming Languages: C, Python , Java(ongoing)

Core Concepts: Data Structures and Algorithms (DSA)

Certifications

- Acquiring Data (Level 1 – AI Fundamentals of AI ASCEND) by Accenture – NASSCOM
- Data Science for Beginners By Board Infinity
