

Vaishnavi Santosh Landage

Sangli, Maharashtra — 8380971647 — vaishnavilandage2006@gmail.com — [LinkedIn](#)

Professional Summary

I am a second-year B.Tech student with a strong interest in software development and problem-solving. I have a solid foundation in Data Structures and Algorithms and am proficient in Python, HTML, CSS, and modern web technologies. I am highly motivated to learn new technologies and collaborate effectively in team-based projects.

Education

Bachelor of Technology in Computer Science and Engineering Rajarambapu Institute of Technology, Rajaramnagar, Sakharale CGPA: 8.5	Ongoing
HSC (12th) Sadaguru Gadge Maharaj College, Karad Percentage: 76.67%	2024
SSC (10th) Kanya Vidyalaya, Manerajuri Percentage: 97.40%	2022

Projects

Blood donors Management System Website

- Frontend: Html, CSS, Javascript
- Backend: php, MySQL workbase
- Developed a blood donation management web application with donar registration, inventory tracking, and machine learning based blood shortage prediction.

Cow and Buffalo Breed Recognition System

- Developed an offline AI based mobile system for cow and buffalo breed identification using image classification with Tensorflow, TensorFlow Lite, Keras, and MobileNetV2, Transfer Learning model. Also we add features like milk yield range, heat tolerance, and basic health apprence to support Farmers.

Smart Image Based Wildlife Monitoring System

- Developed a smart wild animal detection system using Raspberry Pi, Python, OpenCV, PIR sensor, and GSM module to detect animal movement. Capture images via webcam, apply machine learning for identification, and send real time alerts to help protect villages and reduce human wildlife conflict.

Skills

Frontend: HTML, CSS, JavaScript(ongoing)
Programming Languages: C, Python, Java(ongoing)
Core Concepts: Data Structures and Algorithms (DSA)
